

Environment Class Overview

1 Define Environment

1 Pre-defined

- Ohmic (Bosonic)
- Drude-Lorentz (Bosonic)
- Under-damped (Bosonic)
- Lorentzian (Fermionic)

Table 7

2 Custom (Bosonic only)

- Defined from function or array
- Set from: Spectral density, power spectrum, or correlation function

Table 8

2 Choose Solver

1 Bloch-Redfield (weak coupling)

- Input: Power spectrum & system coupling operator

2 HEOM (exact)

- Input: Fit **Correlation Functions** with an exponential series & system coupling operator

Table 9
